

CareTrust Diagnostics & Endocrinology

Dr. Priya Venkat — Endocrinologist & Diabetologist

MBBS, MD (Endocrinology) | Reg: TN-MC-44812 | Care Hospital, Chennai

Patient Name	Meena Devi	Date	27 May 2026
Age / Gender	65 Yrs / Female	Room No	403
Diagnosis	Diabetes Type 2 — post-meal sugar above 200 for 2 consecutive days		
Fasting Sugar	148 mg/dL	HbA1c	7.8%

LAB RESULTS

Test	Result	Normal Range	Status
Fasting Blood Sugar	148 mg/dL	70–100 mg/dL	HIGH
Post-Meal Sugar (2hr)	218 mg/dL	Below 140 mg/dL	HIGH
HbA1c	7.8%	Below 5.7%	HIGH — Poor Control
Serum Creatinine	0.9 mg/dL	0.6–1.2 mg/dL	Normal
eGFR	72 mL/min	Above 60	Normal
Urine Microalbumin	28 mg/g	Below 30 mg/g	Borderline
Total Cholesterol	198 mg/dL	Below 200 mg/dL	Borderline
LDL	118 mg/dL	Below 100 mg/dL	Slightly High

PRESCRIPTION

#	Medicine	Dose	Frequency	Duration	Instructions
1	Metformin	500 mg	Twice daily	90 days	With breakfast and dinner — reduces nausea
2	Glimepiride	1 mg	Once daily morning	30 days	Before breakfast — risk of hypoglycemia
3	Vildagliptin	50 mg	Twice daily	30 days	With or without food
4	Atorvastatin	10 mg	Once daily night	30 days	For LDL management
5	Vitamin D3	60000 IU	Once weekly	8 weeks	Sunday morning with milk

IMPORTANT INSTRUCTIONS

- Monitor post-meal blood sugar 1 hour after every meal — record in care log.
- Alert threshold: sugar above 250 mg/dL — notify doctor immediately.
- Metformin 500mg twice daily: take WITH food — never on empty stomach.
- Glimepiride: take before breakfast. Watch for signs of low sugar (sweating, trembling, confusion).
- If sugar drops below 70 mg/dL — give 15g fast-acting carbs (juice, glucose tablet) immediately.
- Strict diet: avoid rice, white bread, sweets, fried food. Encourage high-fibre foods.
- Foot care: inspect daily for cuts or sores — diabetics heal slowly.
- HbA1c target: below 7.0%. Next review in 4 weeks.
- Vitamin D3 deficiency found — 60000 IU once weekly on Sunday for 8 weeks.
- No insulin currently — if post-meal sugar consistently above 250, insulin may be added.

FOLLOW-UP

Next review: 25 June 2026 | Repeat HbA1c and fasting sugar after 4 weeks.
